IFFPG

FOREWORD

IFFPG had another outstanding year in 2016. A total of 27,193 tonnes of farm plastics waste was recycled, which represented an 8% increase on the previous year.

The national recycling target which increased to 70% in 2016 was exceeded, with a 74% recycling rate recorded for the year. In terms of the market, we had a record year with our members placing 18,927 tonnes of silage wrap and sheeting products on the market. IFFPG also continued to proactively support enforcement authorities during the year through the actions of our Compliance Officer. In 2016, our approval was renewed for the coming 5-year period by the Department of Communications, Climate Action and Environment (DCCAE).

IFFPG collected 27,193 tonnes of farm plastics waste in 2016, which was almost 2,000 tonnes more than the previous year. This significant increase can be attributed to a number of factors. They included an increased number of bring-centres, effective promotion, as well as the growing reputation of the scheme. Another contributory factor was a longer winter feeding season in 2016 which resulted in more fodder been used.

Bring-centres accounted for 92% of all collections in 2016. A total of 237 bring-centres were held, with 24,956 tonnes collected. This represented a 7% increase in collections at bring-centres and clearly demonstrates that bring-centres continue to represent the preferred recycling option for the vast majority of farmers. IFFPG continued to provide a farmyard collection service in 2016, with 2,237 tonnes collected at the farmyard.

During 2016, IFFPG continued its policy of supplying to Irish recyclers where feasible, with over 60% of all material collected supplied to Irish recyclers. The remaining material was exported to EU recycling facilities in compliance with TFS legislation.

The farm plastics market continues to grow, with 2016 representing a record year. Our members placed 18,927 tonnes of product on the market, which was a 3% increase on the previous year. The market has now grown by 20% over the last 5 years due to factors such as the abolition of the milk quota, better grassland management and higher levels of compliance. A growing market is giving rise to increasing recycling targets in terms of volume, which our scheme continues to successfully meet.

During 2016, our Compliance Office continued to support enforcement authorities throughout the country in tackling the problem of illegal farm plastics supply. The highlight in this regard was a repeat of the multi-agency border enforcement initiative. This initiative saw the DCCAE, border local authorities and IFFPG effectively work together to inspect 27 retailers in the border counties.

In July 2016, the Minister renewed our approval for the coming 5 years to operate as the sole producer responsibility initiative in the farm plastics sector. Our renewed approval, will ensure that we continue to provide an efficient, target focused and progressive recycling scheme for the coming 5 year-period.

Two of our directors, John Dunphy who represented the distributor sector and Aidan Larkin who represented the farming sector, stepped down from our board in 2016. The scheme would like to acknowledge and recognise the great contribution and dedication of both John and Aidan to the scheme over the years and wish them the very best for the future. Subsequently, Gavin McCarthy and Tom Cooney were co-opted onto our board to represent the distributor and farming sectors respectively.

Finally, we would like to sincerely thank all our stakeholders for their continued support throughout 2016. We very much look forward to working successfully together again in the year ahead.

Michael Slattery,
IFFPG Chairperson

Liam Moloney,
FFPG Manager

IFFPG

1. REPORT AIMS & OBJECTIVES

In this report, an overview of IFFPG's operational activities for the year 2016 is provided.

Detail is provided under headings such as market size, collections, recycling rates, marketing and promotion, enforcement support activities, as well as other key developments.

The report also sets out proposed activities for 2017 under similar headings.

2. LEGISLATIVE FRAMEWORK

The Waste Management (Farm Plastics) Regulations, 2001 are designed to promote the collection and recovery of farm plastics waste (silage wrap, bags & sheeting).

The regulations require a producer of farm plastics (manufacturer and / or importer) to either:

- become directly involved in the recovery of farm plastics waste from customers through offering a deposit and refund scheme

or

- participate in a government approved recycling scheme

A supplier of farm plastics (wholesaler, retailer, trader or contractor) who is not a member of an approved scheme, must either purchase farm plastics from a producer participating in an approved recycling scheme, or if purchasing from a producer who is offering a deposit and refund scheme, apply charges in accordance with the deposit and refund scheme. Local authorities are responsible for the enforcement of the regulations.

3. IFFPG – THE ORGANISATION

IFFPG which was established in 1998 is the sole national farm plastics recycling scheme.

We are a not for profit organisation, which is approved by the Government to ensure that as a country we responsibly and efficiently manage our farm plastics waste (silage wrap and sheeting).

The primary aims and objectives of IFFPG can be summarised as follows:

- Provide cost effective compliance to our members (companies that place farm plastics products on the market)
- Provide a comprehensive recycling service to farmers nationwide
- Meet national recovery targets as set by the Government
- Enhance our rural environment

All persons or companies involved in the supply of farm plastics are eligible for IFFPG membership. Our board is comprised of representatives from the farm plastics industry, farming, as well as independent representatives from environmental and legal backgrounds. The various sectors represented on our board have the right to nominate at any time candidates for election to our board.

Our members pay an environmental protection contribution, more commonly referred to as the levy, of €110 for every tonne of plastic placed on the market in 2016. The levy, in addition to a weight based collection charge, funds our scheme.

4. THE MARKET

4.1 TOTAL MARKET

Our members placed a record total of 18,927 tonnes of silage wrap and sheeting on the market in 2016.

This was a 3% increase on the previous year, which was also a record year. As can be seen in Chart 1, the farm plastics market has increased by approximately 20% since 2011.

The growing farm plastics market can be attributed to the abolition of the milk quota, improved grassland management and the increasing popularity of silage bales, as well as improved levels of compliance.

Chart 1. Farm Plastics Market 2011-2016

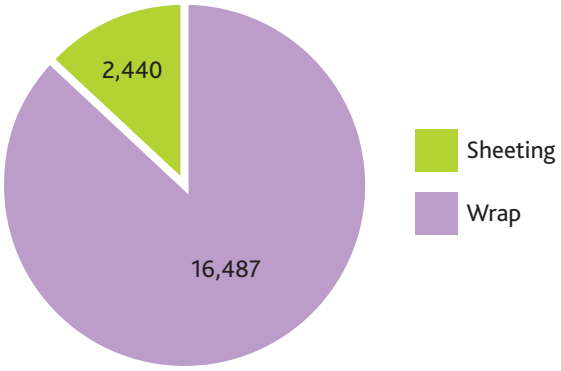
4.2 MARKET BREAKDOWN

Silage wrap continues to grow in popularity with farmers and accounted for 87% (16,487 tonnes) of all farm plastics sold in 2016.

Wrap sales were up 5% in 2016 compared to the previous year. The increasing popularity of wrap can be attributed to the minimal cost and convenience associated with handling and storing silage bales, as well as changing grassland management practices.

In contrast, sheeting sales reduced in 2016 by 7% to 2,440 tonnes.

Chart 2. Market Breakdown 2016



4.3 MEMBERSHIP INTERACTION

IFFPG considers that effective membership interaction is essential to both ensuring that members are kept informed of key developments and that they have the opportunity to raise any issues or concerns that they may have in relation to our scheme.

During 2016, IFFPG continued to effectively interact and communicate with our membership through a range of measures, including:

- The issuing of a quarterly members' ezine (See Appendix 1)
- Holding an AGM to which all members were invited
- The circulation of a label code issuing guide to over 900 retailers (including all members)
- Interactive members' section of our website
- Regular additional contact by email as necessary

A full list of IFFPG members on 31st December 2016 can be viewed in Appendix 2. IFFPG keeps an updated list of members on its website (www.farmplastics.ie).

4.4 THE LEVY

In 2016, the recycling levy increased from €90 to €110 per tonne (excl. VAT). This saw the standard roll of wrap increasing from €2.35 to €2.85 per roll (excl. VAT).

The increase was necessary to ensure that we have the necessary funding to recycle increasing amounts of farm plastics waste in accordance with our approval and comes after a period of levy reductions in the preceding years.

5. COLLECTIONS

5.1 TOTAL COLLECTIONS

IFFPG collected a total of 27,193 tonnes of farm plastics waste from Irish farmers in 2016. This represented an 8% increase on 2015 and was the second highest annual total that our scheme recorded since it was established.

The increase was due to a number of factors. They included the running of an extra 10 bring-centres, a very focused marketing and promotion campaign, the growing reputation of the scheme, as well as a longer winter which saw more farm plastics waste generated.

Chart 3: Farm Plastics Waste Collected 2011-16

5.2 RECYCLING TARGET

IFFPG recycled 27,193 tonnes of farm plastics waste in 2016, which equated to a 74% recycling rate. We therefore exceeded the DCCAE recycling target for the year which increased from 65% to 70% (see Table 1).

Table 1: Recycling Rate 2016

	TARGET TONNES	TARGET %
Recycling Target (Incl. 50% contamination)	25,658	70
IFFPG Recycling level	27,193	74

This means that in 2016 IFFPG recycled 74% of what its members placed on the market in the previous year after allowing for a 50% contamination level (mainly moisture).

5.3 BRING-CENTRES

A total of 24,956 tonnes of material was collected at bring-centres in 2016, which represented a 7% increase on the previous year.

IFFPG increased the number of bring-centres that it operated in 2016 by 10 to a total number of 237 bring-centres. This increase, along with a focused marketing campaign, growing reputation and a long winter accounted for the significant rise recorded for the year.

Chart 4. Number of Bring-centres and Quantities Collected 2011-2016

Bring-centres accounted for 92% of all collections in 2016, which was similar to the previous year. They are very much the preferred recycling option for farmers due to factors such as quality of service, convenience and cost effectiveness.

Table 2: Material Collected Breakdown 2016

COLLECTION METHOD	TONNES	%
Bring-centres	24,956	92
Farmyards	2,237	8
Total	27,193	100

As usual, locations such as livestock marts, coop yards, GAA fields and local authority recycling facilities were used as bring-centres. All IFFPG bring-centres were registered with the relevant local authorities as required by waste legislation.

5.4 FARMYARD COLLECTIONS

In 2016, IFFPG collected 2,237 tonnes of farm plastics waste at farmyards, which equated to 8% of total collections. Farmyard collections remain popular for a small number of farmers who prefer the convenience of having their farm plastics waste collected at the farmyard.

5.5 COLLECTION CHARGES

IFFPG increased its collection charges from €12 to €15 per half tonne with the label code (See Table 3). The increase, which followed a sustained period of reductions, was necessary to ensure that our scheme has the necessary funding to continue to grow recycling in compliance with the conditions of our approval.

Farmers who present valid label codes at collections are able to prove that they purchased levied product and therefore can avail of significantly reduced collection charges.

Table 3: Collection Charges 2016

SERVICE	WITH LABEL CODE (€)	WITHOUT LABEL CODE (€)
500 kg Farm Plastics at Bring-centre	15	85
500 kg Farm Plastics at Farmyard	40	100

In the case of farmyard collections, the collection charge remained at €40 per half tonne with the label code.

5.6 IFFPG CONTRACTORS

Details in relation to our current contractors are provided in Appendix 3.

6. SUPPLY TO RECYCLING FACILITIES

IFFPG ensured that all waste collected in 2016 was recycled in advance of the 2017 season.

IFFPG continued with its policy of supporting Irish recycling facilities where feasible, with over 60% of all waste going to Irish facilities.

Our remaining waste was exported as an amber listed waste to EU recycling facilities in strict compliance with Trans Frontier Shipment (TFS) legislation.

IFFPG continues to benefit from farm plastics waste having a positive value as a result of continued strong demand for the waste stream from recyclers within the EU.

Farm plastics waste is recycled into a range of products, including plastics packaging and refuse sacks, damp proofing products and piping.

7. MARKETING & PROMOTION

The main objective of our marketing campaign in 2016 was the promotion of the full range of recycling services to farmers that we provided at our bring-centres to ensure that the national recycling target was met.

This involved not only promoting the services of IFFPG, but also promoting the services of our sister company, Farm Plastics Recycling Ltd. This company provides a recycling service for other farm plastics wastes such as fertiliser bags, feed bags, drums and netting (See Section 9).

IFFPG spent a total of €90,000 on marketing and promotion in 2016, with the main marketing media employed highlighted in Table 4.

Examples of advertisements used by IFFPG in 2016 can be seen in Appendix 4.

Table 4: Marketing Media 2016

MARKETING MEDIA EMPLOYED	FREQUENCY
The Irish Farmers 'Journal advertisements	18
Regional newspaper advertisements	32
SMS	180,000 texts
Agricultural shows / exhibitions	4
Social media (website, Facebook & twitter)	On-going

8. ENFORCEMENT SUPPORT

Although IFFPG has no statutory powers, we remain committed to supporting local authorities in enforcing the farm plastics regulations through the activities of our Compliance Officer.

The farm plastics regulations require farm plastics suppliers to support recycling in Ireland (See Section 2).

Once again IFFPG participated in a multi-agency border enforcement campaign during the silage making season. The campaign saw the DCCAE, the Connacht Ulster waste enforcement regional lead authority, border local authorities and our Compliance Officer combining forces to target farm plastics retailers in the border counties during the silage making season. In particular, non-coop suppliers, such as agri-merchants and silage contractors were targeted. A total of 27 inspections were carried out, with only one minor non-compliance detected.

In addition, our Compliance Officer assisted a number of local authorities elsewhere in the country with suspected cases of illegal supply.

Throughout 2016, IFFPG also continued to effectively manage our farm plastics traceability system. This traceability system sees farmers who purchase levied product issued with a unique label code by retailers, which when presented at the bring-centre ensures reduced collections charges.

9. RECYCLING OTHER FARM PLASTICS WASTES

IFFPG's sister company, Farm Plastics Recycling Ltd. (FPR), which provides a recycling service for other farm plastics wastes (fertiliser bags, feed bags, drums & netting), had a record year for collections in 2016.

In total, FPR collected 1,026 tonnes of other farm plastics waste streams, which was a 35% increase on the previous year. Netting, which accounted for half of the total, was the single biggest waste stream collected.

FPR charged €15 per bag (500 kg size bag) at bring-centres in 2016, with the service promoted in all IFFPG advertisements. IFFPG receives an annual management fee from FPR, with IFFPG contractors also contracted to collect on behalf on FPR.

10. OTHER KEY DEVELOPMENTS

10.1 APPROVAL RENEWAL

During 2016 IFFPG had its approval (license) renewed by the DCCAE to continue operating as the sole farm plastics recycling compliance scheme for the coming 5-year period.

The approval sets out the various targets, operating procedures and practices that will apply to our scheme until the year 2020.

Our current approval requires that the annual national recycling target increases from 65% to 70%, as well as setting out agreed standards that must be achieved under various headings including reporting, interaction with members, supporting enforcement, cost control, contingency reserve and risk and issue management.

Also in 2016, IFFPG adopted the Code of Corporate Governance for Compliance Scheme as issued by the DCCAE. This is a common code of corporate governance which applies to all compliance schemes in Ireland and will ensure that our scheme continues to have appropriate structures and systems in place to allow it to be directed and controlled to the highest possible standards.

10.2 CHANGES TO OUR BOARD

IFFPG saw 2 changes to its board in 2016. John Dunphy and Aidan Larkin who represented the distributor sector and farming sector respectively stepped down from our board after many years of dedicated service. IFFPG acknowledges

and recognises the outstanding contribution that both John and Aidan made to the scheme during their time on the board and wishes them the very best for the future.

Subsequently, Gavin McCarthy and Tom Cooney were co-opted onto our board to represent the distributor sector and farming sector respectively. Both Gavin and Tom will go forward for election at our AGM in 2017.

10.3 RECYCLE PINK CHARITY INITIATIVE

In 2016 IFFPG made a €10,000 contribution to the Irish Cancer Society as part of our recycle pink charity initiative. This initiative, which was a follow on to the on-going pink wrap charity initiatives of some of our members, saw IFFPG make a contribution to breast cancer research and support for pink wrap we recycled in 2016.

11. PROGRAMME OF ACTIVITIES FOR 2017

11.1 THE LEVY

The levy will remain at €110 per tonne (excl. VAT) for 2017. The guide price for a standard roll of wrap will remain at €2.85 (excl. VAT).

11.2 COLLECTIONS

IFFPG will continue to provide a comprehensive collections service to farmers in 2017, which will involve both a comprehensive bring-centre programme, as well as a farmyard collection service.

11.2.1 Bring-centre Programme

IFFPG will once again provide farmers with a comprehensive bring-centre programme in 2017. The season will begin in early April and run until the end of July. In as much as possible, the same sites will be used in 2017 as were used in 2016. As required by waste legislation, all bring-centre sites will be registered with local authorities.

It is intended to hold 237 bring-centres in 2017, which is the same number as was held in 2016. The current number of bring-centres is considered optimal, with the average farmer now only 6 miles from his local bring-centre.

The programme will be heavily promoted by a range of media, in particular the Irish Farmers Journal, text messaging, social media and the farming website Agriland.ie. IFFPG will also promote its bring-centre programme at agricultural shows and through social media.

A full bring-centre programme for the year is provided in Appendix 5.

11.2.2 Farmyard Collection Service

IFFPG will continue to provide a farmyard collection service in 2017 for farmers who prefer the convenience of this service. Farmers can avail of this service by contacting our office directly to organise a collection.

11.2.3. Collection Charges

Collection charges at the bring-centre will remain at €15 per half tonne with the label code, while they will remain at €40 per half tonne at the farmyard with the label code (See Table 4).

Table 5: Collection Charges 2017

SERVICE	WITH LABEL CODE (€)	WITHOUT LABEL CODE (€)
500 kg Farm Plastics at Bring-centre	15	85
500 kg Farm Plastics at Farmyard	40	100

11.2.4 National Recycling Target

The national recycling target in percentage terms remains at 70% in 2017. However, in terms of volume it has increased by 840 tonnes to 26,497 tonnes (See Table 5). The increased recycling target in terms of volume is due to an increase in the quantity of farm plastics products placed on the market by our members in 2016. The volume target is additionally challenging in that it comes on the back of a relatively short winter which resulted in less farm plastics waste been generated.

Table 6: Recycling Targets 2017

YEAR	% TARGET	VOLUME TARGET (INCL. 50% CONTAMINATION LEVEL)
2016	70	25,658
2017	70	26,498

However, IFFPG is confident that the target will be exceeded with the focus on attracting more farmers to bring-centres to offset the anticipated reduced volume presented per farmer. This will be largely achieved through a focused marketing campaign that highlights the convenience and cost effectiveness of our service, and the ever-growing reputation of our scheme.

11.2.5 Supply to Recycling Facilities

In 2017, IFFPG intends to continue with its policy of supplying to Irish recycling facilities where feasible. It is expected that at least 50% of all waste collected in 2017 will be domestically processed.

In the case of waste exported to European facilities, we will continue to ensure that we export in strict compliance with TFS legislation.

IFFPG will also continue with its policy of ensuring that all material collected in a particular season is recycled in advance of the following season.

11.3 ENFORCEMENT SUPPORT

IFFPG will continue in 2017 to support the enforcement efforts of authorities through the activities of our Compliance Officer.

In particular, our Compliance Officer will prioritise supporting the annual multi-agency border enforcement campaign. This will involve:

- Working in partnership with agencies such as the Connacht Ulster waste enforcement regional lead authority, border local authorities and the DCCAE
- Identifying non-coop retailers for inspection
- Supporting inspections and follow up enforcement actions during the critical silage making season
- Pressing for prosecutions in cases of clear illegality
- Highlighting the campaign in the local media

IFFPG also intends to work closely in 2017 with the waste enforcement lead authorities (WERLAs) in the 3 waste regions. It is considered that effective interaction between our Compliance Officer and the WERLAs will deliver a more consistent and efficient approach to enforcement nationwide.

In addition, our Compliance Officer will continue to focus in 2017 on ensuring that our label code traceability system is efficiently managed. This will involve continuing to liaise closely with retailers to ensure that they correctly issue the label code and highlighting to farmers the cost savings associated with presenting a valid label code at collections.

11.4 OTHER KEY DEVELOPMENTS

11.4.1 IT Management System

During 2017 IFFPG will develop a new integrated IT collection management system, to be ready for the beginning of the 2018 season. The new IT system will allow for the electronic capture of all collections data at bring-centres, the rapid delivery of collections data to the IFFPG Office, as well as greatly improved report running functions. In addition, the new system will record and manage all interactions with retailers and enforcement support work.

11.4.2 Amended Regulations

The DCCAE has indicated that it intends to amend the farm plastics regulations in 2017 to include netting producers from the end of the year. That being the case, IFFPG will make the necessary arrangements to provide compliance to netting producers from the end of 2017.

3	Membership Compliance Certificates

BRING-CENTRES OFF TO A GOOD START

IFFPG's bring-centre programme which began in early April has got off to a good start with collections to date up 5% on last year. Early results are very encouraging when bad weather conditions in April, which prevented many farmers from leaving their cattle out of sheds, is taken into account. IFFPG is working towards increasing recycling by 5-10% this year, with somewhere in the region of 27,000 tonnes of farm plastics waste expected to be recycled for the year.

IFFPG's bring-centres programme began in Waterford in early April and since then 54 bring-centres have been carried out throughout the country. So far a total of 5,547 tonnes has been collected which represents a 5% increase on the same time last year. It is expected that recycling levels will increase this year due to a number of factors. Excellent growth conditions last summer saw the market for wrap and sheeting increase to almost 18,500 tonnes, while a long winter feeding season has resulted in more farm plastics waste available for recycling.

The scheme is now confident that it will grow recycling from just over 25,000 tonnes last year to approximately 27,000 tonnes this year.

IFFPG bring-centres performing well this year

In total 236 bring-centres will be provided this year, with other farm plastics waste such as fertiliser bags, feed bags and drums in addition to silage plastics waste collected at all bring-centres. Information in relation to our bring-centre calendar for 2016 can be found at **www.farmplastics.ie**.

IFFPG :: EZINE :: MAY'16 :: ISSUE 16

hich proved very effective last year to begin.

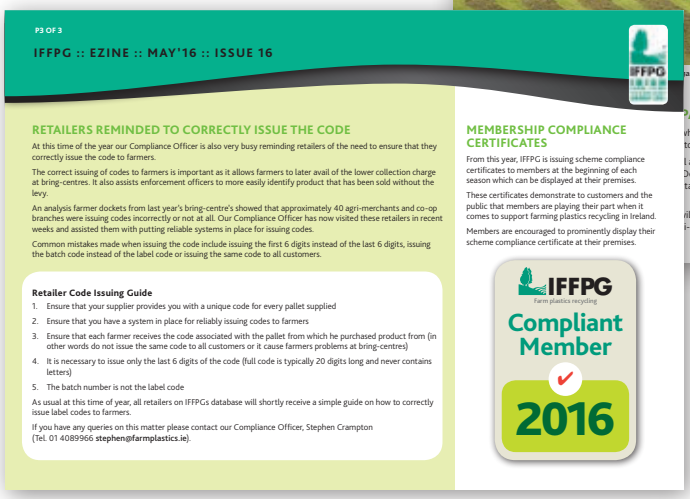
l authorities (Donegal, Leitrim, Department of Environment and tailers during the critical May-June

ill be carried out during this period, i-merchants and silage contractors.

Our Compliance Officer will accompany enforcement officers on inspections and later assist local authorities with any subsequent enforcement actions undertaken.

Multi-agency cooperation of this type in the border region is considered essential to ensure that both recent compliance improvements are maintained and that the necessary enforcement infrastructure is in place to deal with any upsurge in illegality associated with a weakening sterling.

A press release on the campaign which was recently issued is currently being carried by newspapers in the border region.



P3 OF 3

IFFPG :: EZINE :: MAY'16 :: ISSUE 16

RETAILERS REMINDED TO CORRECTLY ISSUE THE CODE

At this time of the year our Compliance Officer is also very busy reminding retailers of the need to ensure that they correctly issue the code to farmers.

The correct issuing of codes to farmers is important as it allows farmers to later avail of the lower collection charge at bring-centres. It also assists enforcement officers to more easily identify product that has been sold without the levy.

An analysis farmer dockets from last year's bring-centre's showed that approximately 40 agri-merchants and co-op branches were issuing codes incorrectly or not at all. Our Compliance Officer has now visited these retailers in recent weeks and assisted them with putting reliable systems in place for issuing codes.

Common mistakes made when issuing the code include issuing the first 6 digits instead of the last 6 digits, issuing the batch code instead of the label code or issuing the same code to all customers.

Retailer Code Issuing Guide

1. Ensure that your supplier provides you with a unique code for every pallet supplied
2. Ensure that you have a system in place for reliably issuing codes to farmers
3. Ensure that each farmer receives the code associated with the pallet from which he purchased product from (in other words do not issue the same code to all customers or it cause farmers problems at bring-centres)
4. It is necessary to issue only the last 6 digits of the code (full code is typically 20 digits long and never contains letters)
5. The batch number is not the label code

As usual at this time of year, all retailers on IFFPGs database will shortly receive a simple guide on how to correctly issue label codes to farmers.

If you have any queries on this matter please contact our Compliance Officer, Stephen Crampton (Tel. 01 4089966 **stephen@farmplastics.ie**).

MEMBERSHIP COMPLIANCE CERTIFICATES

From this year, IFFPG is issuing scheme compliance certificates to members at the beginning of each season which can be displayed at their premises.

These certificates demonstrate to customers and the public that members are playing their part when it comes to support farming plastics recycling in Ireland.

Members are encouraged to prominently display their scheme compliance certificate at their premises.
